

Urinary Incontinence

Dr. Bernhard Uhl

Department for Obstetrics and Gynecology

St. Vinzenz-Hospital Dinslaken

Germany

Urinary-Incontinence

A hidden problem worldwide and
also in Nepal

Dr. Bernhard Uhl

The Hidden Problem

- Shame
- lack of knowledge of treatment options
- If lack of awareness even by young women the problem felt belonging to life
- Strong impairment of the quality of life
- social isolation

Treatment why?

- Women play a vital role in building a society
 - They are
 - Mothers → bring up the Future of next generation
 - Wives → shaping their families lives
 - Independent individuals

Without healthy and quality life they cannot concentrate in these roles

Camp in Gorkha, Harmi

We went for Prolapse screening, but we ended up finding more patients suffering from urinary incontinence (300 pts in 3 days)
